

# Spectroscopic Imaging & Diagnosis of Neoplasia (National Cancer Institute)

TMS/LSS Instrumentation  
and Analysis Tools  
*Feld (MIT)*

Quasi-Multiple Scattering  
in Multi-Layered Tissue  
*Backman (Northwestern)*

HPV-Based Spectroscopic  
Markers, *Munger (HMS),  
Georgakoudi (MGH)*

LSS  
Imaging

TMS  
Diagnosis

Clinical Validation & Biological Correlation

Oral Dysplasia  
*Shapshay (BMC)*

Cervical Dysplasia  
*Feldman & Crum (BWH)*

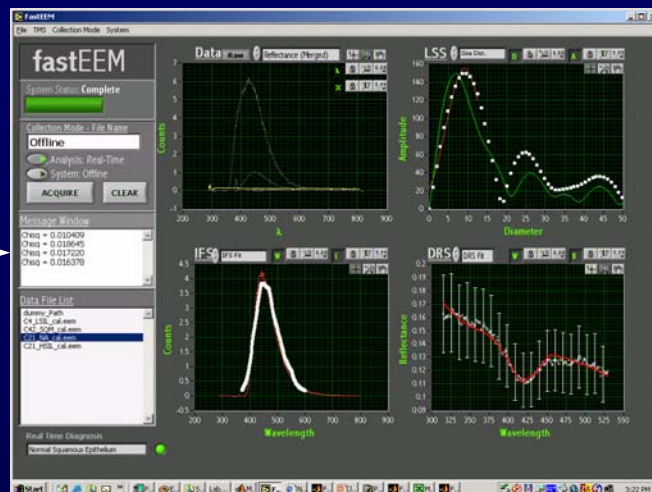

Quantitative Pathology  
*Badizadegan (MGH)*

# Spectroscopic Imaging & Diagnosis of Neoplasia

## Real-Time “Spectral Diagnosis”

Optical Probe  
“Spectral Biopsy”

Expert  
Histopathology

Molecular  
Diagnostics

Quantitative  
Morphometry

Model Fit to data for  
5 nm beads in water

Spectral  
Markers  
Of HPV
